

Response NEXTGen for Mission Critical Control Rooms

RESPONSE NEXTGEN

Adaptive Design & Purpose Built

Regardless of room size or configuration, Evans can tailor our Response NEXTGen platform to fit the uniqueness of your control room.

Designed From the Operator Out

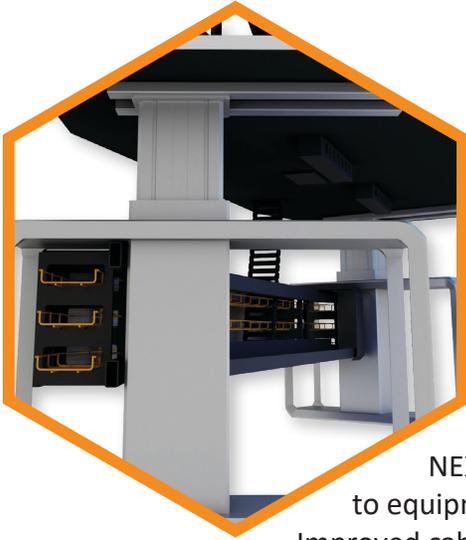

Response NEXTGen is functionally configured with attention to ergonomics and comfort for 24/7 use by Operators in a continual use environment.

Built to Last with a Lifetime Warranty

Steel tube frame construction, along with state-of-the-art materials provide strength and durability. Our lifetime warranty provides peace of mind.

RESPONSE **NEXT** GEN™ consoles adapt to any Mission Critical Center.

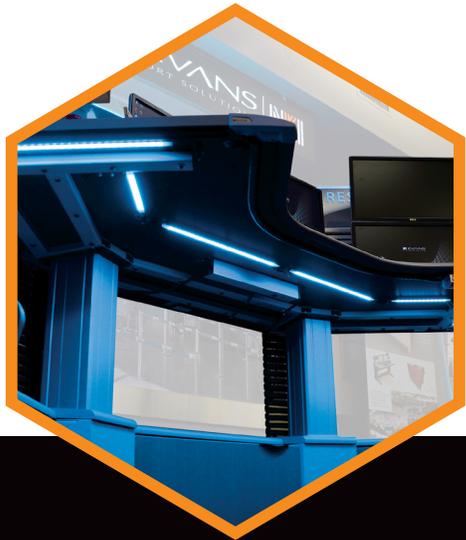

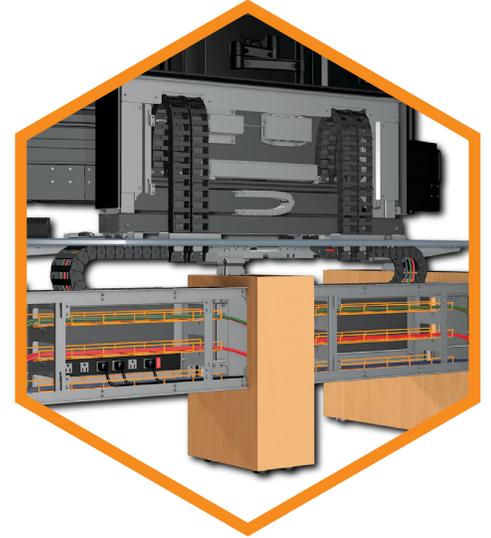

Modular Sit-Stand Consoles with Heavy Duty Lift Columns

Evans robust consoles are designed and built to accommodate any room configuration. Our modular approach allows you to optimize operator positions, sightlines, ergonomic function and console sizing. Heavy duty lift columns with load capacity of up to 2500N per lift column.

Open Architecture Tech Bridge & Advanced Cable Management

NEXTGen open architecture allows easy access to equipment accommodating local or remote CPUs. Improved cable management provides deeper and wider cable raceways with full front and rear access allowing future technology changes as they arise.

EnviroLinc Control Systems & LumiLinc Situational Awareness

Evans' unique system integrates custom controls for temperature, console height, monitor placement, and audio via its EnviroLinc platform. LumiLinc situational awareness tools allow you to identify, respond and react to anything you encounter. Custom branding is available for company logos and colors.

Ultimate Room Flexibility with RESPONSE **NEXT** GEN™
